(54) RECORDER

(57)Abstract:

PROBLEM TO BE SOLVED: To obtain a recorder capable of a multi-color recording with a wide variation and a good color reproducibility by providing a plurality of recording units, and arranging the recording units along the conveyance path of a supporting member such that optional addition or reduction can be conducted.

SOLUTION: A recording paper P passes through recording units in the order of 20n, ..., 20b, 20a, so that an image is recorded thereon. The recording paper P is discharged outside a recorder 10 by a discharging roller 52 provided in a discharging unit 50. In the recorder 10, recording units can be optionally added or reduced by releasing a unit fitting pin 22b and a unit fitting hole 22a at an optional position.

Further, a recording unit having an optional kind of a coloring particle can be mounted at an optional position with an optional order. Accordingly, a recorder with a wide variation can be obtained.
